Every five years, the Barry Conservation District conducts a Resource Needs Assessment to determine the strengths and concerns about the natural resources in our county. These community forums are opportunities for you to share your insights about our woods, waters and open spaces as well as the creatures that inhabit them. Whether you work the land, enjoy hunting or other outdoor recreation, or just appreciate nature, please join us at either venue to provide your perspective and help direct the future efforts of agencies and organizations whose work affects natural resources in Barry County.
